BAILEY SMITH

AI TRAINER | AI RESPONSE EVALUATOR

Hastings, MN - open to remote • (651) 208-0000 • heybaileysmith@gmail.com • linkedin.com/in/bailey-smith-mn

Summary

I catch mistakes for a living: as a casino supervisor I oversee four live tables and up to $500,000 in chips. Now I'm moving into AI training and response evaluation to catch the mistakes AI makes. I don't just use AI tools, I build them and try to break them: an agent crew that has to argue its way to an answer, a security gate that has vetted 60 open-source repositories, and a review that caught an AI inventing credentials on my own resume. I'm in Codecademy's agentic AI bootcamp: AI evaluation now, AI engineering next. Hand me the rubric, and I'll find what the model got wrong.

Skills

AI evaluation: LLM and generative AI response evaluation, rating and ranking AI answers against rubrics and detailed guidelines, fact-checking and research, hallucination detection, clear written feedback

Quality and auditing: attention to detail, checking payouts and procedures in real time, catching and correcting errors, verifying transaction paperwork, following detailed procedures, record keeping, Microsoft Excel

Communication: native English speaker, strong spelling and grammar, independent remote work

AI and tools: Claude Code, AI agents and multi-agent workflows, prompt engineering, local models (Ollama, MCP server), Python (beginner), pytest, SQL (Kaggle certified), SQLite, Git, PowerShell; machine learning basics (bootcamp)

Domain knowledge and license: casino table games and procedures, restaurant management, construction; tribal gaming license (passed background check)

AI Projects

Built with Claude Code: I wrote the specs and reviewed and tested the output.

AI agent crew | *Claude Code subagents, Ollama* 2026

- Designed a team of AI agents with set roles (coordinator, skeptic, researcher, code reviewer) that challenge each other's work before I make a call.
- Adapted an open-source "LLM council" method (five AI advisors, anonymous peer review, a chair's verdict) and added a step that checks every answer against evidence before it is accepted.

AI output review | *Resume-Matcher, Ollama* 2026

- Pointed an open-source AI resume tool at five real job postings and checked its output against my real resume line by line; caught it inventing a language, a certification, and an award, and rejected every rewrite it produced.

Open-source vetting pipeline | *PowerShell, Git, GitHub CLI* 2026

- Built a gate that blocks every open-source tool until it is sandboxed and security-scanned; 60 repositories checked.

Experience

Treasure Island Resort & Casino, Welch, MN Jan 2025 - Present
Dual-Rate Dealer / Supervisor (table games)

- Check payouts and procedures across four live tables at once, up to $500,000 in chips, catching and correcting errors in real time.
- Supervise dealers and correct their work on the spot; verify fill and credit paperwork and records, including Excel.
- Keep the table calm, compliant, and professional through big wins, losses, and disputes.

Handles, San Diego, CA Jan 2022 - Aug 2022
Manager

- Led the team, ran inventory controls, and prepared daily profit, inventory, and safe-count reports.

Earlier experience: Foreman, H-1 Construction, Honolulu, HI (2018); Server, Bungalow, Lakeland, MN (2015 - 2018)

Education

Codecademy Sep 2026 - Nov 2026
Building Agentic AI Applications bootcamp

San Diego Mesa College, San Diego, CA 2023 - 2024
Architecture coursework; GPA 3.6, Dean's List

Century College, MN
Associate of Arts coursework

Certifications

SQL Certificate | *Kaggle* Oct 2026
